

LLM API Integration

Scenario 1 :

The screenshot displays a REST client interface for a project named "GenAI-Jul-HomeAssignment". The selected endpoint is "S01-Text to Audio" with a POST method. The URL is "https://api.groq.com/openai/v1/audio/speech". The request body is a JSON object:

```
1 {
2   "model": "canopylabs/orpheus-v1-english",
3   "input": "[Cheerful] vanakkam. I am a language model created by Groq. I am here to help
4     you with any questions you may have. How can I assist you today?",
5   "voice": "diana",
6   "response_format": "wav"
7 }
```

The response status is "200 OK" with a duration of 2.68 s and a size of 402.36 KB. The response body is a WAV audio file, which is displayed as a black rectangle with a play button and a progress bar (0:00 / 0:08). A "Add to favorites" button is also visible. The interface includes tabs for Docs, Params, Authorization, Headers (12), Body (selected), Scripts, and Settings. There are also buttons for Save, Share, Send, Schema, Beautify, Hex, Preview, and Visualize.
